Long Stay Geriatric Statistics  
1986

Planning Unit

Department of Health

## STATISTICS ON LONG-STAY GERIATRIC PATIENTS 1986

### Introduction

In 1981, Planning Unit, Department of Health initiated an annual survey of patients in long-stay geriatric units. The purpose of this survey is to provide statistics on a regular basis on the number of beds available, how they are used and the type of patients who occupy them.

The following information is sought from each hospital/home:

- (a) number of beds at end of year
- (b) number of patients in residence at end of year
- (c) age, sex and medical status of patients in residence
- (d) number and source of admissions during year
- (e) number and destination of discharges during year
- (f) length of stay of patients discharged during year.

### Survey of long-stay patients - year ended 31st December, 1986

The present report gives the results of the seventh survey which relates to the year ended 31st December 1986.

### Response

275 long-stay units were contacted and 249 completed returns were received in the Department. This represents a response rate of 91% for long-stay units but it includes approximately 95% of all long-stay geriatric beds. Returns received include all the Health Board hospitals and homes. The attached tables are based on the returns received.

### Presentation of Results

Section A provides some demographic data relating to the elderly. The table was drawn from the 1981 Census of Population.

Results are presented at three levels - national tables, relating to each category of long-stay home; health board tables which show regional variations and finally a series of tables presenting information for each long-stay unit.

## TABLE OF CONTENTS

### INTRODUCTION

Section A	Demographic Data Relating to the Elderly, 1981
Section B	National Tables - By Category of Hospital
Table B (1)	Long-Stay Geriatric Units 1986
B (2)	Medical/Social Status of Patients Resident in Long-Stay Geriatric Units on 31/12/1986
B (3)	Sex of Patients Resident in Long-Stay Geriatric Units on 31/12/1986
B (4)	Age Distribution in Long-Stay Geriatric Units on 31/12/1986
B (5)	Source of Admissions to Long-Stay Geriatric Units in 1986
B (6)	Destination of Discharges from Long-Stay Geriatric Units in 1986
B (7)	Length of Stay of Patients Discharged from Long-Stay Geriatric Units in 1986.
Section C	Regional Tables - By Health Board Area
