

## Vision for Change Survey Results

# A Vision for Change

ADVANCING MENTAL HEALTH  
IN IRELAND

## Contents

Vision for Change Survey Results.....	1
Chapter 3.....	27
Statement: .....	27
3.2 Advocacy should be available as a right to all service users in all mental health services in all parts of the country. ....	27
Statement: .....	33
3.3 Innovative methods of involving service users and carers should be developed by local services, including the mainstream funding and integration of services organised and run by service users and carers of service users. ....	33
Statement: .....	35
3.6 Carers should be provided with practical support/measures such as; inclusion in the care planning process with the agreement of the service user, inclusion in the discharge planning process, timely and appropriate information and education, planned respite care and should have a member of the multidisciplinary team to act as a keyworker/designated point of contact with the team and to ensure these services are provided.....	35
Statement: .....	38
3.7 The experiences and needs of children of service users should be addressed through integrated action at national, regional and local level in order that such children can benefit from the same life chances as other children. ....	38
Statement: .....	40
3.8 Mental health services should provide ongoing, timely and appropriate information to service users and carers as an integral part of the overall service they provide.....	40
Statement: .....	42
3.9 Information on the processes involved in making complaints or comments on mental health services should be widely available.....	42
Statement: .....	46
3.10. Service user involvement should be characterised by a partnership approach which works according to the principles outlined in this chapter and which engages with a wide variety of individuals and organisations in the local community. ....	46

Chapter 4.....	48
Statement: .....	48
4.1 All citizens should be treated equally. Access to employment, housing and education for individuals with mental health problems should be on the same basis as every other citizen.....	48
Statement: .....	51
4.2 Evidence-based programmes to tackle stigma should be put in place, based around contact, education and challenge.....	51
Statement: .....	52
4.5 Mental health services should take account of local deprivation patterns in planning and delivering mental health care. ....	52
Statement: .....	54
4.7 The provision of social housing is the responsibility of the Local Authority. Mental health services should work in liaison with Local Authorities to ensure housing is provided for people with mental health problems who require it.....	54
Statement: .....	56
4.8 Mental health services should be provided in a culturally sensitive manner. Training should be made available for mental health professionals in this regard, and mental health services should be resourced to provide services to other ethnic groups, including provision for interpreters.....	56
Chapter 5.....	59
Statement: .....	59
5.1 Sufficient benefit has been shown from mental health promotion programmes for them to be incorporated into all levels of mental health and health services as appropriate. Programmes should particularly focus on those interventions known to enhance protective factors and decrease risk factors for developing mental health problems.....	59
Statement: .....	62
5.2 All mental health promotion programmes and initiatives should be evaluated against locally agreed targets and standards.....	62
Statement: .....	64

5.3 A framework for inter-departmental cooperation in the development of cross-cutting health and social policy should be put in place. The NAPS framework is a useful example of such an initiative (see Chapter Four). .....	64
Statement: .....	68
5.5 Training and education programmes should be put in place to develop capacity and expertise at national and local levels for evidence-based prevention of mental disorders and promotion of mental health. ....	68
Chapter 7.....	70
Statement: .....	70
7.1 All individuals should have access to a comprehensive range of interventions in primary care for disorders that do not require specialist mental health services.....	70
Statement: .....	72
7.2 Further research and information on the prevalence of mental health problems in primary care and the range of interventions provided in primary care is needed to effectively plan primary care services and the interface between primary care and specialist mental health services. ....	72
Statement: .....	74
7.3 All mental health service users, including those in long-stay wards, should be registered with a GP.....	74
Statement: .....	76
7.4 Appropriately trained staff should be available at the primary care level to provide programmes to prevent mental health problems and promote wellbeing.....	76
Statement: .....	80
7.5 It is recommended that the consultation/liaison model should be adopted to ensure formal links between CMHTs and primary care.....	80
Statement: .....	84
7.6 Mental health professionals should be available in the primary care setting, either within community care, the primary care team or the primary care network.....	84
Statement: .....	87

7.7 Local multidisciplinary CMHTs should provide a single point of access for primary care for advice, routine and crisis referral to all mental health services (community and hospital based). .....	87
Statement: .....	88
7.8 Protocols and policies should be agreed locally by primary care teams and community mental health teams - particularly around discharge planning. There should be continuous communication and feedback between primary care and the CMHT.....	88
Statement: .....	91
7.9 A wide range of incentive schemes should be introduced to ensure mental health treatment and care can be provided in primary care. ....	91
Statement: .....	93
7.10 Physical infrastructure that meets modern quality standards should provide sufficient space to enable primary care and CMHTs to provide high quality care. ....	93
Statement: .....	95
7.11 The education and training of GPs in mental health should be reviewed. GPs should receive mental health training that is appropriate to the provision of mental health services described in this policy (i.e. community-based mental health services). Service users should be involved in the provision of education on mental health.....	95
Chapter 9.....	97
Statement: .....	97
9.1 To provide an effective community-based service, CMHTs should offer multidisciplinary home-based treatment and assertive outreach, and a comprehensive range of medical, psychological and social therapies relevant to the needs of service users and their families. Each multidisciplinary team should include the core skills of psychiatry, nursing, social work, clinical psychology, occupational therapy. The composition and skill mix of each CMHT should be appropriate to the needs and social circumstances of its sector population.....	97
Statement: .....	105
9.3 Links between CMHTs primary care services, voluntary groups and local community resources relevant to the service user's recovery should be established and formalised.....	105
Statement: .....	108

9.4 All CMHTs should have direct access to medical and radiological services as part of the comprehensive assessment of specific presentations. ....	108
Statement: .....	109
9.5 Evaluation of the activities of the CMHT in terms of meaningful performance indicators should take place on an annual basis and incorporate service user feedback.....	109
Statement: .....	111
9.6 Research should be undertaken to establish how many services currently have effective CMHTs and to identify the factors that facilitate and impede effective team functioning and the resources required to support the effective functioning of CMHTs.....	111
(This question will be answered nationally) .....	111
Chapter 10.....	114
Statement: .....	114
10.2 Child and adolescent mental health services should provide mental health services to all aged 0-18 years. Transitional arrangements to facilitate the expansion of current service provision should be planned by the proposed National Mental Health Service Directorate and the local CMHTs.....	114
Statement: .....	117
10.3 It is recommended that service users and their families and carers be offered opportunities to give feedback on their experience and to influence developments within these services.....	117
Statement: .....	120
10.4 Programmes addressing mental health promotion and primary prevention early in life should be targeted at child populations at risk.....	120
Statement: .....	123
10.5 For those children in school settings it is recommended that the SPHE be extended to include the senior cycle and that evidence-based mental health promotion programmes be implemented in primary and secondary schools. ....	123
Statement: .....	124
10.7 Two child and adolescent CMHTs should be appointed to each sector (population: 100,000). One child and adolescent CMHT should also be provided in each catchment area (300,000 population) to provide liaison cover.....	124

Statement: .....	128
10.8 These child and adolescent CMHTs should develop clear links with primary and community care services and identify and prioritise the mental health needs of children in each catchment area.....	128
Statement: .....	132
10.9 Urgent attention should be given to the completion of the planned four 20-bed units in Cork, Limerick, Galway and Dublin, and multidisciplinary teams should be provided for these units.....	132
Statement: .....	134
10.10 Early intervention and assessment services for children with autism should include comprehensive multidisciplinary and paediatric assessment and mental health consultation with the local community mental health team, where necessary.....	134
Chapter 11.....	140
Statement: .....	140
11.1 Education and promotion of positive mental health should be encouraged within the general community. These initiatives should have clearly specified goals and objectives and should be evaluated regularly.....	140
Statement: .....	144
11.2 A Health Promoting College Network should be developed and implemented.....	144
(This question will be answered nationally) .....	144
Statement: .....	146
11.3 CMHTs should provide support and consultation to primary care providers in the management and referral of individuals with mental health problems. ....	146
Statement: .....	152
11.4 The proposed general adult mental health service should be delivered through the core entity of one Community Mental Health Team (CMHT) for sector populations of approximately 50,000. Each team should have two consultant psychiatrists. ....	152
Statement: .....	159

11.5 It is recommended that a shared governance model, incorporating clinical team leader, team coordinator and practice manager be established to ensure the provision of best-practice integrated care, and evaluation of services provided.....	159
Statement: .....	163
11.6 CMHTs should be located in Community Mental Health Centres with consideration for easy access for service users. High quality day hospitals and acute in-patient care facilities should also be provided. ....	163
Statement: .....	169
11.7 CMHTs should evolve a clear care plan with each service user and, where appropriate, this should be discussed with carers. ....	169
Statement: .....	173
11.8 Each team should include a range of psychological therapy expertise to offer individual and group psychotherapies in line with best practice.....	173
Statement: .....	176
11.9 Service users and providers should collaborate to draw up clear guidelines on the psychological needs of users and the range of community resources and supports available to them locally. ....	176
Statement: .....	180
11.10 Home-based treatment teams should be identified within each CMHT and provide prompt services to known and new service users as appropriate. This sub-team should have a gate-keeping role in respect of all hospital admissions. ....	180
Statement: .....	186
11.11 Arrangements should be evolved and agreed within each CMHT for the provision of 24/7 multidisciplinary crisis intervention. Each catchment area should have the facility of a crisis house to offer temporary low support accommodation if appropriate. ....	186
Statement: .....	189
11.12 In addition to the existing Early Intervention Services (EIS) pilot project currently underway in the HSE, a second EIS pilot project should be undertaken with a population characterised by a different socio-demographic profile, with a view to establishing the efficacy of EIS for the Irish mental health service. ....	189
Statement: .....	192
11.13 Each 50 bed acute psychiatric unit should include a close observation unit of six beds. ....	192

Statement: .....	193
11.14 Each of the four HSE regions should provide a 30-bed ICRU unit - with two sub-units of 15 beds each - to a total of 120 places nationally, staffed with multidisciplinary teams with appropriate training. ....	193
Statement: .....	195
11.15 Each of the four HSE regions should provide two high support intensive care residences of ten places each. ....	195
Chapter 12.....	198
Statement: .....	198
12.1 A strong commitment to the principle of "Recovery" should underpin the work of the rehabilitation CMHT - the belief that it is possible for all service users to achieve control over their lives, to recover their self-esteem, and move towards building a life where they experience a sense of belonging and participation.....	198
Statement: .....	200
12.2 Some 39 rehabilitation and recovery CMHTs should be established nationally, with assigned sector populations of 100,000. Assertive outreach teams providing community-based interventions should be the principal modality through which these teams work. ....	200
Statement: .....	204
12.3 The physical infrastructure required to deliver a comprehensive service should be provided in each sector. Rehabilitation and recovery CMHTs should have responsibility for those physical resources appropriate to the needs of their service users, such as community residences.....	204
Statement: .....	207
12.4 Opportunities for independent housing should be provided by appropriate authorities with flexible tenancy agreements being drawn up in accordance with each service user's needs. Arrangements that best enable service users to move from high support to low support and independent accommodation need to be considered. ....	207
Statement: .....	211
12.5 Rehabilitation and recovery mental health services should develop local connections through linking with local statutory and voluntary service providers and support networks for people with a mental illness is required to support community integration. ....	211
Statement: .....	213

12.6 All current staff within the mental health system who are appointed to rehabilitation and recovery services should receive training in recovery-oriented competencies and principles. ....	213
Statement: .....	217
12.9 Evaluation of services to the severe and enduring service user group should incorporate quality-of-life measures and assess the benefit and value of these services directly to service users and their families. ....	217
Chapter 13.....	220
Statement: .....	220
13.3 Health promotion programmes and initiatives found to be beneficial to older adults should be implemented. ....	220
Statement: .....	222
13.4 Primary health care teams should play a major role in assessment and screening for mental illness in older people and should work in a coordinated and integrated manner with the specialist teams to provide high quality care, particularly care that is home-based. ....	222
Statement: .....	223
13.5 A total of 39 MHSOP multidisciplinary teams should be established nationally, one per 100,000 population, providing domiciliary and community-based care. ....	223
Statement: .....	226
13.6 Priority should be given to establishing comprehensive specialist MHSOP where none currently exist. ....	226
Statement: .....	228
13.7 Physical resources essential to service delivery, acute beds and continuing care, service headquarters, community-based and day facilities should be provided for Mental Health Services for Older People within each sector. ....	228
Statement: .....	231
13.8 There should be eight acute assessment and treatment beds in each regional acute psychiatric unit for Mental Health Services for Older People .....	231
Statement: .....	233

13.9 There should be one central day hospital per mental health catchment area (300,000 population) providing 25 places, and a number of travelling day hospitals in each mental health catchment area.....	233
Statement: .....	236
13.10 There should be an appropriate provision of day centres in each mental health catchment area, but their provision should not be the responsibility of the MHSOP.....	236
Statement: .....	238
13.11 There should be appropriate recognition and linkage with voluntary agencies in the field.....	238
Statement: .....	241
13.12 Carers and families should receive appropriate recognition and support including education, respite, and crisis response when required. ....	241
Statement: .....	245
13.14 There should be 30 continuing care places for older people with mental disorders in each mental health catchment area.....	245
Chapter 14.....	247
Statement: .....	247
14.2 Detailed information on the mental health of people with intellectual disability should be collected by the NIDD. This should be based on a standardised measure. Data should also be gathered by mental health services for those with intellectual disability as part of national mental health information gathering.....	247
(This question to be answered nationally) .....	247
Statement: .....	249
14.5 All people with an intellectual disability should be registered with a GP and both intellectual disability services and MHID teams should liaise with GPs regarding mental health care. ....	249
Statement: .....	252
14.6 Mental health services for people with intellectual disability should be provided by a specialist mental health of intellectual disability (MHID) team that is catchment area-based. These services should be distinct and separate from, but closely linked to, the multidisciplinary teams in intellectual disability services who provide a health and social care service for people with intellectual disability. ....	252

Statement: .....	255
14.7 The multidisciplinary MHID teams should be provided on the basis of two per 300,000 population for adults with intellectual disability. ....	255
Statement: .....	256
14.8 One MHID team per 300,000 population should be provided for children and adolescents with intellectual disability. ....	256
Statement: .....	258
14.9 A spectrum of facilities should be in place to provide a flexible continuum of care based on need. This should include day hospital places, respite places, and acute, assessment and rehabilitation beds/places. A range of interventions and therapies should be available within these settings. ....	258
Statement: .....	260
14.10 In order to ensure close integration, referral policies should reflect the needs of individuals with intellectual disability living at home with their family, GPs, the generic intellectual disability service providers, the MHID team and other mental health teams such as adult and child and adolescent mental health teams. ....	260
Statement: .....	262
14.11 A national forensic unit should be provided for specialist residential care for low mild, and moderate range of intellectual disability. This unit should have ten beds and be staffed by a multidisciplinary MHID team. ....	262
(This question will be answered nationally) .....	262
Chapter 15.....	267
Statement: .....	267
15.1.2 Forensic Mental Health Services should be expanded and reconfigured so as to provide court diversion services and legislation should be devised to allow this to take place. ....	267
Statement: .....	270
15.1.3 Four additional multidisciplinary, community-based forensic mental health teams should be provided nationally on the basis of one per HSE region. ....	270
Statement: .....	271

15.1.4 The Community Mental Health should be replaced or remodelled to allow it to provide care and treatment in a modern, up-to-date humane setting, and the capacity of the Community Mental Health should be maximised. ....	271
Statement: .....	275
15.1.6 A dedicated residential 10-bed facility with a fully resourced child and adolescent mental health team should be provided with a national remit. An additional community-based, child and adolescent forensic mental health team should also be provided.....	275
Statement: .....	276
15.1.7 A 10-bed residential unit, with a fully resourced multidisciplinary mental health team should be provided for care of intellectually disabled persons who become severely disturbed in the context of the criminal justice system. ....	276
Statement: .....	278
15.1.8 Education and training in the principles and practices of Forensic Mental Health should be established and extended to appropriate staff, including An Garda Síochána. ....	278
Statement: .....	281
15.2.1 A data base should be established to refine the dimension and characteristics of homelessness and analyse how services are currently dealing with it. ....	281
Statement: .....	284
15.2.2 In the light of this information, scientifically acquired and analysed, make recommendations as to requirements and implement them.....	284
Statement: .....	285
15.2.4 A range of suitable, affordable housing options should be available to prevent the mentally ill becoming homeless.....	285
Statement: .....	287
15.2.5 The CMHT team with responsibility and accountability for the homeless population in each catchment area should be clearly identified. Ideally this CMHT should be equipped to offer assertive outreach. Two multidisciplinary, community-based teams should be provided, one in North Dublin and one in South Dublin, to provide a mental health service to the homeless population.....	287
Statement: .....	291

15.2.6 Community mental health teams should adopt practices to help prevent service users becoming homeless, such as guidelines for the discharge of people from psychiatric in-patient care and an assessment of housing need/living circumstances for all people referred to mental health services.....	291
Statement: .....	294
15.2.7 Integration and coordination between statutory and voluntary housing bodies and mental health services at catchment area level should be encouraged. ....	294
Statement: .....	296
15.3.1 Mental health services for people with co-morbid severe mental illness and substance abuse problems.....	296
Mental health services for both adults and children are responsible for providing a mental health service only to those individuals who have co-morbid substance abuse and mental health problems.....	296
Statement: .....	300
15.3.2 General adult CMHTs should generally cater for adults who meet these criteria, particularly when the primary problem is a mental health problem. ....	300
Statement: .....	302
15.3.4 Specialist adult teams should be developed in each catchment area of 300,000 to manage complex, severe substance abuse and mental disorder. ....	302
Statement: .....	305
15.3.6 Two additional adolescent multidisciplinary teams should be established outside Dublin to provide expertise to care for adolescents and co-morbid addiction and mental health problems. This provision should be reviewed after five years. ....	305
(This question will be answered nationally) .....	305
Statement: .....	308
15.4.1 Mental health services for people with eating disorders. ....	308
Health promotion initiatives that support greater community and family awareness of eating disorders should be supported and encouraged.....	308
Statement: .....	312
15.4.2 The activities of voluntary agencies in promoting awareness and responses to eating disorders should be supported.....	312

Statement: .....	314
15.4.3 Special emphasis should be placed on including training modules on eating disorders in the undergraduate and postgraduate training of health professionals. ....	314
Statement: .....	318
15.4.4 Eating disorders in children and adolescents should be managed by the child and adolescent CMHTs on a community basis, using beds in one of the five in-patient child and adolescent units if required.....	318
Statement: .....	320
15.4.5 There should also be a full multidisciplinary team in a National Centre for Eating Disorders, to be located in one of the national children's hospitals, for complex cases that cannot be managed by local child and adolescent CMHTs. ....	320
(This question will be answered nationally) .....	320
Statement: .....	323
15.4.6 There should be four specialist multidisciplinary teams providing specialist in-patient, outpatient and outreach services for eating disorders; one team per HSE region. These teams should link closely with local adult CMHTs to ensure continuity of care.....	323
Statement: .....	324
15.4.7 Each team should manage an eating disorder sub-unit in a regional general hospital mental health unit. These subunits should have six beds each, thereby contributing 24 public ED beds nationally. ....	324
Statement: .....	326
15.4.8 The four specialised multidisciplinary adult teams, and the national team for children and adolescents, should provide community-based consultation, advice and support to all agencies in their area. ....	326
(This question will be answered nationally) .....	326
Statement: .....	328
15.5.1 Liaison mental health services.....	328
The existing provision of nine LMHS teams nationally should be increased to thirteen. ....	328

Statement: .....	330
15.5.2 Complete multidisciplinary LMHS should be established in the three national children's hospitals.....	330
Statement: .....	333
15.5.3 Liaison child and adolescent mental health services should be provided by a designated child and adolescent CMHT, one per 300,000 population (see Chapter 10) .....	333
Statement: .....	334
15.5.4 One additional adult psychiatrist and senior nurse with perinatal expertise should be appointed to act as a resource nationally in the provision of care to women with severe perinatal mental health problems. ....	334
Statement: .....	336
15.6.1 Neuropsychiatry services .....	336
Two specialist neuropsychiatry multidisciplinary teams should be established in the major neuroscience centres in Dublin and Cork. ....	336
Statement: .....	338
15.6.2 As a national resource, a special neuropsychiatric in-patient unit with six to ten beds should be established. ....	338
Statement: .....	339
15.6.3 Facilities for video-conferencing and telemedicine should be considered to extend the expertise located in these units nationally, and to enable them to become a consultation and training resource.....	339
Statement: .....	341
15.7.1 Suicide Prevention .....	341
There should be agreed protocols and guidelines for engaging with those assessed to be at high risk of suicidal behaviour, and for engaging with those who are particularly vulnerable in the wake of a suicide, within mental health care settings. ....	341
Statement: .....	344
15.7.2 Particular care should be given to service users of mental health services who have been identified as being at high risk of suicidal behaviour e.g. those with severe psychosis, affective disorders, and individuals in the immediate aftermath of discharge from in-patient settings.....	344

Statement: .....	346
15.7.4 The strategies recommended in Reach Out to prevent suicide and to improve mental health provision for people engaging in suicidal behaviour should be adopted and implemented nationally.....	346
Statement: .....	349
15.8.1 People with borderline personality disorder.....	349
The needs of people with mental health problems arising from or co-morbid with borderline personality disorder should be recognised as a legitimate responsibility of the mental health service, and evidence-based interventions provided on a catchment area basis. ....	349
Statement: .....	351
15.8.2 Specialised therapeutic expertise should be developed in each catchment area to deal with severe and complex clinical problems that exceed the available resources of generic CMHTs.....	351
Chapter 16.....	353
Statement: .....	353
16.1 Mental Health Catchment Areas should be established with populations of between 250,000 and 400,000 with realigned catchment boundaries to take into account current social and demographic realities. These catchment areas should be coterminous with local health office areas and the new regional health areas. They should take into account the location of acute psychiatric in-patient units in general hospitals. ....	353
Statement: .....	360
16.2 Substantial upgrading of information technology systems should occur to enable the planning, implementation and evaluation of service activity. ...	360
Statement: .....	367
16.3 A National Mental Health Service Directorate should be established, which includes senior professional managers, senior clinicians and a service user. The new National Mental Health Service Directorate should act as an advisory group and be closely linked with the management of the Primary and Continuing Care Division of the Health Service Executive.....	367
Statement: .....	370

16.4 Multidisciplinary Mental Health Catchment Area Management Teams should be established. These teams should include both professional managers and clinical professionals along with a trained service user and should be accountable to the National Care Group Manager and the National Mental Health Service Directorate. ....	370
Statement: .....	373
16.5 Community Mental Health Teams should self-manage through the provision of a team coordinator, team leader and team practice manager. ....	373
Statement: .....	379
16.6 Community Mental Health Teams should be responsible for developing costed service plans and should be accountable for their implementation. ..	379
Statement: .....	382
16.7 A management and organisation structure of National Mental Health Service Directorate, a multidisciplinary Mental Health Catchment Area Management Team and local, self-managing CMHTs, should be put in place.....	382
Statement: .....	386
16.8 Mental Health Catchment Area Management Teams should facilitate the full integration of mental health services with other community care area programmes. This should include the maximum involvement with self-help and voluntary groups together with relevant local authority services.....	386
Statement: .....	391
16.9 Community Mental Health Teams and Primary Care Teams should put in place standing committees to facilitate better integration of the services and guide models of shared care.....	391
Chapter 17.....	394
Statement: .....	394
17.1 Substantial extra funding is required to finance this policy. A programme of capital and non-capital investment in mental health services as recommended, adjusted in line with inflation, should be implemented in a phased way over the next seven to ten years, in parallel with the reorganisation of mental health services.....	394
Statement: .....	400
17.2 Capital and human resources should be remodelled within re-organised catchment-based services to ensure equity and priority in service developments. ....	400

Statement: .....	403
17.3 Other agencies must take up their responsibilities in full so mental health services can use their funding for mental health responsibilities. Mental health services should not provide the broad range of services which are more appropriately provided elsewhere. ....	403
Statement: .....	406
17.4 Approximately 1,800 additional posts are required to implement this policy. this significant non-capital investment will result in mental health receiving approximately 8.24% of current, non-capital health funding, based on 2005 figures (This question will be completed nationally) .....	406
Statement: .....	409
17.5 Recognition must be given to the need for extra funding for areas that exhibit social and economic disadvantage with associated high prevalence of mental ill health. ....	409
Statement: .....	413
17.6 Resources, both capital and revenue, in the current mental health service must be retained within mental health. ....	413
Statement: .....	416
17.7 The full economic value of psychiatric hospital buildings and lands should be professionally assessed and realised. ....	416
Statement: .....	420
17.8 Provision of community mental health centres as service bases for multidisciplinary community mental health teams should be given priority. ....	420
Statement: .....	429
17.9 The comprehensive and extensive nature of the reorganisation and financing of mental health services recommended in this policy can only be implemented in a complete and phased way over a period of seven to ten years. ....	429
Chapter 18.....	432
Statement: .....	432
18.1 E&T should be directed towards improving services as a primary goal and must have the welfare of service users as its ultimate objective.....	432
Statement: .....	435

18.2 Training programmes should emphasise the acquisition of skills that are clinically meaningful, should train personnel for leadership and innovative roles, and should foster an attitude of critical enquiry and self-scrutiny in relation to service delivery.....	435
Statement: .....	438
18.3 There should be centralisation of the planning and funding of education and training for mental health professionals in new structures to be established by the HSE in close association with the National Directorate of Mental Health Services. This centralised E&T authority should be constituted to represent stakeholder and service user interest and E&T bodies representing all disciplines.....	438
(This question will be answered nationally) .....	438
Statement: .....	441
18.4 The HSE should commit itself to adequate, rational and consistent funding of E&T. However the accreditation of courses should remain the responsibility of the respective professional bodies. ....	441
(This question will be answered nationally) .....	441
Statement: .....	444
18.5 Funding of HSE sponsored training courses should be established on a secure basis to allow for expansion and development of these courses and to ensure manpower requirements in mental health services can be met in coming years.....	444
(This question will be answered nationally) .....	444
Statement: .....	446
18.6 A multi-profession manpower plan should be put in place, linked to projected service plans. This plan should look at the skill mix of teams and geographically, taking into account the service models recommended in this report and should be prepared by the National Mental Health Service Directorate working closely with the Health Service Executive, the Department of Health and Children and service providers. This should include consideration of a re-allocation of resources working group to ensure equitable distribution of manpower resources across the four regions.....	446
(This question will be answered nationally) .....	446
Statement: .....	448
18.7 Family friendly staff policies and flexible rostering with provision of suitable child care facilities is an important issue for the recruitment and retention of staff, as is help with housing, particularly for foreign nationals. ....	448

Statement: .....	452
18.8 A flexible retirement package should be considered to make the best use of valuable experienced staff. This would enable staff nearing retirement to move into part-time work without reducing pension benefit or to retire while carrying on with full or part-time work. Staff earlier on in their career should be able to take a career break and still contribute to their pension benefits. ....	452
(This question will be answered nationally) .....	452
Statement: .....	455
18.9 Future manpower requirements must be driven by service requirements rather than historical factors and should not be wedded to the perceived needs of any single discipline. ....	455
(This question will be answered nationally) .....	455
Statement: .....	457
18.10 Within the context of overall service changes, many currently employed staff will need to redefine their role in the light of the development of new community-based teams focusing on early intervention, assertive outreach, crisis resolution and home treatment. Appropriate training should be available for affected staff. ....	457
(This question will be answered nationally) .....	457
Statement: .....	459
18.11 A personal training and development plan or equivalent should be introduced for all grades of staff in the mental health services. This should help managers set priorities for the use of resources in order to meet common needs more efficiently, organise staff release and target and schedule in-house education and training. In this regard it is also important to make available clear information about routes to employment training and career progression within the mental health service. ....	459
(This question will be answered nationally) .....	459
Statement: .....	462
18.12 The quality and scope of undergraduate medical education programmes should be reviewed and the recommendations of the Fottrell report to increase intake should be adopted.....	462
(This question will be answered nationally) .....	462

Statement: .....	464
18.13 Current steps to revise post graduate training in psychiatry should be undertaken with a view to increasing the number of graduates in this speciality and equipping them with the range of skills required within the proposed restructured mental health service. ....	464
(This question will be answered nationally) .....	464
Statement: .....	466
18.14 The GP training body and the psychiatry training bodies should jointly review all issues in relation to mental health training for GPs. ....	466
(This question will be answered nationally) .....	466
Statement: .....	468
18.15 A common foundation core programme for all student nurses, followed by specialist training up to the point of registration as a psychiatric, intellectual disability or general nurse should be given serious consideration. In the interim, shortened training should be available for all qualified nurses wishing to register in any of the other nursing disciplines. ....	468
(This question will be answered nationally) .....	468
Statement: .....	471
18.16 The recommendations of the Nursing and Midwifery Resource, July 2002 Final Report of the Steering Group "Towards Workforce Planning" should be implemented in full and further developed on a multidisciplinary basis. ....	471
(This question will be answered nationally) .....	471
Statement: .....	474
18.17 The number of psychiatric nurses in training should be kept under constant review to allow scope for the future development of general adult, child and adolescent and other specialist mental health services and primary care teams. ....	474
(This question will be answered nationally) .....	474
Statement: .....	476
18.18 The sponsorship scheme for experienced care assistants to train as nurses should be maintained and extended to ensure appropriate, mature applicants are attracted into the psychiatric nursing profession. ....	476

(This question will be answered nationally) .....	476
Statement: .....	479
18.19 There is no official requirement to involve service users and carers in the education and training of psychiatric nurses. It is recommended that service users and carers should be consulted and involved in the development of educational programmes. ....	479
(This question will be answered nationally) .....	479
Statement: .....	481
18.20 Specialist and advanced nurse practitioner roles for nurses in intellectual disability should be developed in response to identified needs of people using the service. ....	481
Statement: .....	483
18.21 A mental health training module should be mandatory and standardised in social work training to ensure all staff especially those without practice experience have a basic understanding of mental health issues and mental health services. ....	483
(This question will be answered nationally) .....	483
Statement: .....	485
18.22 A significant increase in the number of funded postgraduate training places for clinical psychology is needed urgently to fill the current shortfall and meet projected manpower requirements. Additional appointments at senior grade should be established to facilitate supervised clinical placements for those in training. The use of the Assistant Psychologist grade as a career step should also be considered. ....	485
(This question will be answered nationally) .....	485
Statement: .....	489
18.23 In order to increase the attractiveness of mental health social work and occupational therapy posts, existing deficiencies in terms of professional and geographical isolation, lack of supervision and poor facilities should be addressed. ....	489
(This question will be answered nationally) .....	489
Statement: .....	491
18.24 It is recommended that the position of mental health support worker be established in the mental health system to support service users in achieving independent living and integration in their local community. ....	491

(This question will be answered nationally) .....	491
Statement: .....	493
18.25 Advocacy training programmes should be encouraged and appropriately financed. ....	493
Statement: .....	497
18.26 A National Manpower Planning Group should be established to make recommendations regarding the education, training and workforce issues arising from this report, with reference to clinical psychology, counselling psychology and psychotherapy. ....	497
(This question will be answered nationally) .....	497
Statement: .....	499
18.27 A variety of programmes should be in place for the workplace such as induction programmes, health and safety programmes (for example, cardio-pulmonary resuscitation) and training in conducting staff appraisals. ....	499
Statement: .....	503
18.28 The establishment of structured, accredited training courses and other measures to support and encourage volunteering in the mental health service should be considered within the broad context of education and training. ....	503
Chapter 19.....	505
Statement: .....	505
19.1 Service users and carers should have ready access to a wide variety of information. This information should be general (e.g. on mental health services in their area) and individualised (e.g. information on their medication). ....	505
Statement: .....	508
19.2 The HIQA should put mechanisms in place to carry out systematic evaluations on all forms of interventions in mental health and this information should be widely disseminated.....	508
(This question will be answered nationally) .....	508
Statement: .....	510
19.3 Measures should be put in place to collect data on community-based mental health services. ....	510

Statement: .....	511
19.4 In accordance with the recommendation in the National Health Information Strategy, an electronic patient record (EPR) should be introduced with a unique identifier for every individual in the state. ....	511
(This question will be answered nationally) .....	511
Statement: .....	513
19.5 A national mental health minimum data set should be prepared, in consultation with relevant stakeholders. ....	513
(This question will be answered nationally) .....	513
Statement: .....	515
19.6 Mental health services should implement mental health information systems locally that can provide the national minimum mental health data set to a central mental health information system. ....	515
Statement: .....	517
19.7 A national morbidity survey should be carried out to determine the prevalence of mental health problems in the population. ....	517
(This question will be answered nationally) .....	517
Statement: .....	519
19.8 Research should focus on mental health service - outcomes, policy and service, and economics - creating an evidence base for mental health care... ..	519
Statement: .....	523
19.9 The recommendations of the Health Research Strategy should be fully implemented as the first step in creating a health research infrastructure in mental health services. ....	523
(This question will be answered nationally) .....	523
Statement: .....	525
19.10 A national mental health services research strategy should be prepared. ....	525
(This question will be answered nationally) .....	525
Statement: .....	527

19.11 Dedicated funding should be provided by the Government for mental health service research.....	527
(This question will be answered nationally) .....	527
Statement: .....	529
19.12 People with experience of mental health difficulties should be involved at every stage of the research process including the development of research agendas, commissioning, overseeing, conducting and evaluating research as well as supporting the use of the emerging evidence base in policy and practice. ....	529
(This question will be answered nationally) .....	529
Statement: .....	531
19.13 Mental health research should be part of the training of all mental health professionals and mental health services should be structured to support the ongoing development of these skills. ....	531
Chapter 20.....	534
Statement: .....	534
20.2 The National Mental Health Service Directorate, in conjunction with the HSE, should put in place advisory, facilitatory and support capacity to assist the change process.....	534
Statement: .....	543
20.3 The first steps that should be taken to implement this policy include the management and organisational changes recommended in Chapter 16 and the provision of training and resources for change. ....	543
Statement: .....	546
20.4 Mental hospitals must be closed in order to free up resources to provide community-based, multidisciplinary team-delivered mental health care for all. A plan to achieve this should be put in place for each mental hospital. ....	546
Statement: .....	552
20.5 An independent monitoring group should be appointed by the Minister for Health and Children to oversee the implementation of this mental health policy.....	552

<b>Chapter 3</b>			
<b>Statement:</b>			
<b>3.2 Advocacy should be available as a right to all service users in all mental health services in all parts of the country.</b>

<b>Chapter 16</b>			
<b>Statement:</b>			
16.1 Mental Health Catchment Areas should be established with populations of between 250,000 and 400,000 with realigned catchment boundaries to take into account current social and demographic realities. These catchment areas should be coterminous with local health office areas and the new regional health areas. They should take into account the location of acute psychiatric in-patient units in general hospitals.

<b>Chapter 17</b>			
<b>Statement:</b>			
17.1 Substantial extra funding is required to finance this policy. A programme of capital and non-capital investment in mental health services as recommended, adjusted in line with inflation, should be implemented in a phased way over the next seven to ten years, in parallel with the reorganisation of mental health services.			
<b>Responses</b>			
<b>Has your service received substantial extra funding since the publication of Vision for Change in January 2006?</b>

<b>Statement:</b>			
18.8 A flexible retirement package should be considered to make the best use of valuable experienced staff. This would enable staff nearing retirement to move into part-time work without reducing pension benefit or to retire while carrying on with full or part-time work. Staff earlier on in their career should be able to take a career break and still contribute to their pension benefits.			
(This question will be answered nationally)

<b>Statement:</b>			
20.4 Mental hospitals must be closed in order to free up resources to provide community-based, multidisciplinary team-delivered mental health care for all. A plan to achieve this should be put in place for each mental hospital.			
<b>Responses</b>			
<b>Have any traditional psychiatric hospitals been closed in your Area?</b>
