The ORC maintains a specialised library of books, journals, CD-ROMs and reports in print and electronic media on cancer relating to patient care, research and planning. Staff and students can avail of computer, printing and photocopying facilities provided in the Oncology Resource Centre.

Book of the Month!

Essential reading for January!

Medical and psychosocial care of the cancer patient by Miller, Kenneth. (616.994 MILL)

Book Summary
This groundbreaking clinical reference provides a comprehensive perspective of the multiple issues facing cancer survivors, ranging from early post-treatment through long-term care. Clear, clinically practical chapters written by experts in the field concentrate on multi-dimensional issues that confront cancer survivors. Divided into four, focused sections overview of survivorship, medical care, psychosocial care, and epidemiologic this book is evidence-based and uses case examples and illustrations throughout to add to the understanding of the material and its application to the individual patient. Primary care physicians, nurses, oncologists, hematologists, students of medicine, and survivorship researchers will all find this to be a valuable asset in setting the standard of care in the field of...
