Clinical Effectiveness

The Corporate Agenda

- Operating as a healthcare system that is always clinically effective. This requires several components to work together:
 - **Best Practice Definition**
 - **Implementation** of Best Practice for the patient, in all contexts, at all times
 - **A learning system**
 - **An assurance process**

Accountability Framework

- Balanced Scorecard
- Performance Agreements
- Processes
 - Oversight Group
 - Assurance reports
- Escalation, interventions and sanctions

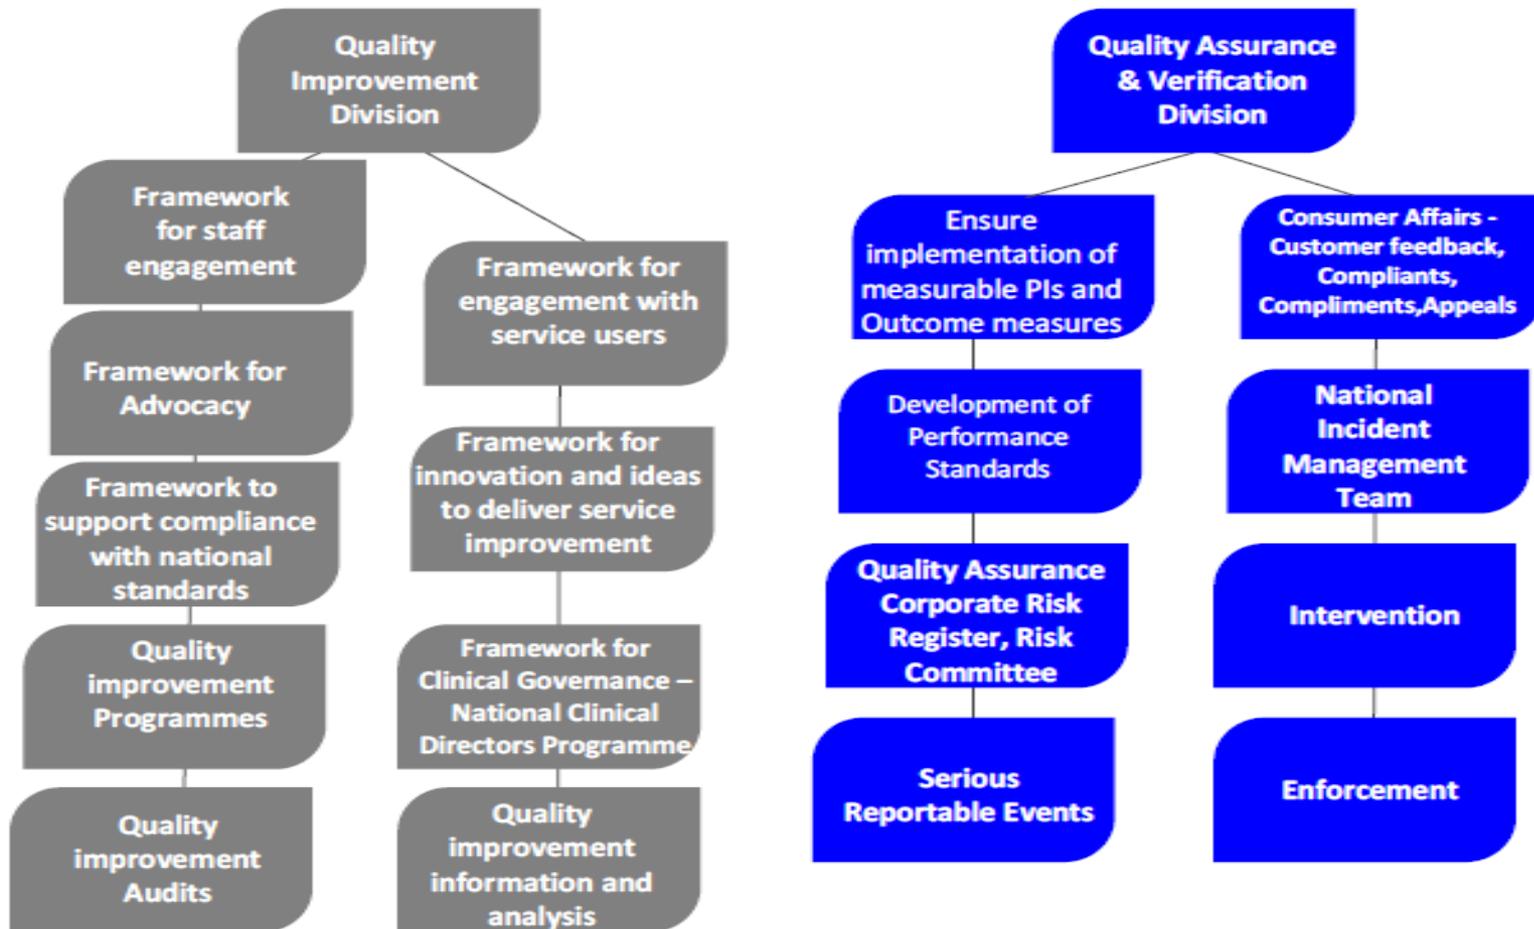

Quality & Patient Safety Enablement Programme

- The objective of the Quality and Patient Safety Enablement Programme is to deliver safer services, quality improvements and a patient safety culture across the health services

Enablement Programme Objectives

- 1:** Services must subscribe to a set of clear quality standards that are based on international best practice.
- 2:** Services must be safe and that there must be a robust level of both quality improvement and quality assurance.
- 3:** Services must be relevant to the needs of the population.
- 4:** Patients must be appropriately empowered to interact with the service delivery system.

Areas of Responsibility
