SOUTHERN HEALTH BOARD - - - - -	P.80-88
WESTERN HEALTH BOARD - - - - -	P.89-97

## FOREWORD

This is the 6th report of the Children in Care survey. There is a number of changes in preparation, presentation and content from previous years.

### Preparation of the Report

This report is the first Children in Care survey to have been processed entirely on the Department of Health's information system. A special word of thanks is due to Jim Graham, Chris MacLochlainn and Tadhg O'Sullivan of the Department's Organisation Unit and also to the social workers and other health board staff who supplied the raw material for the report.

### Presentation of the Report

This report is divided into three main parts. Part A contains information on children in the care of health boards on one particular day (31 December, 1984); Part B contains information on children who were at any time in the care of health boards in 1984 - this is significantly different information from that in Part A, as children continuously enter and leave the care of health boards during a year; Part C contains information strictly relating to the year 1984. Detailed information on individual health boards is given in Appendices.

The nomenclature used in the report takes account of the Status of Children Act, 1987.

### Content of the Report

Changes have been made from previous years in an effort to make the information more relevant and easily understood. Some tables have been added, some omitted and some re-designed. This development will be taken a stage further in the next report.

### Number of Children in Care

The number of children in care on 31 December, 1984 was 2,400, a decrease of approximately 5% on the previous 31 December. The number of children who were at any time in care during 1984 was 3,671, an increase of approximately 2% on 1983.

**PART A**

CHILDREN IN THE CARE OF HEALTH BOARDS ON 31ST DECEMBER, 1984
